

Wheels Car Rental System

Connect your customers, your employees, your business

wheelsys.com

Designed by you

Wheels Car Rental is designed in association with car rental agencies world-wide and is continuously improved to meet every-day changing needs.

Our development team actively interacts with customers, listens to your needs and concerns and carefully evaluates feedback.

Wheels Car Rental has become the choice of hundreds of businesses in over 45 countries.

Designed for you

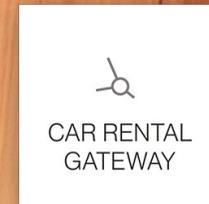

We start and end our day thinking how we can make your experience better using our system.

Updates are issued every 2 weeks to deliver the latest developments

Easy to use

We make it easy for you and your people. With minimal training, your team will be up and running with Wheels Car Rental. Our training team will work side by side with your people, answering their questions, explaining business scenarios and tasks.

The intuitive user interface of Wheels Car Rental increases productivity and reduces errors.

Car Broker / OTA / GDS Connectivity

Wheels Car Rental is connected to **all the major car brokers** and **OTA** as well as **Travelport**. Rates are managed in a **uniform way** from Wheels and **every channel** can have its own rate rules, terms and availability constrains. Offering an average **response speed of 50ms** and currently serving **millions of requests**, you are assured your business will be displayed on your favorite channels, **every single time**.

Rates are updated **instantly across all channels** while you can setup Wheels to **automatically shift rates up or down** based on your **utilization**. Using **Pulse**, an **optional module** of Wheels you can visualize demand and trends in a series of dashboards built by our **product experts**.

"Following a review of the system at the head office of Invensys, besides the incredibly user friendly interface it was clear that the Wheels system was at least 10 years ahead of any other system available on the market place. In addition, the support of Vassilis and George along with their team was genuinely out of this world."

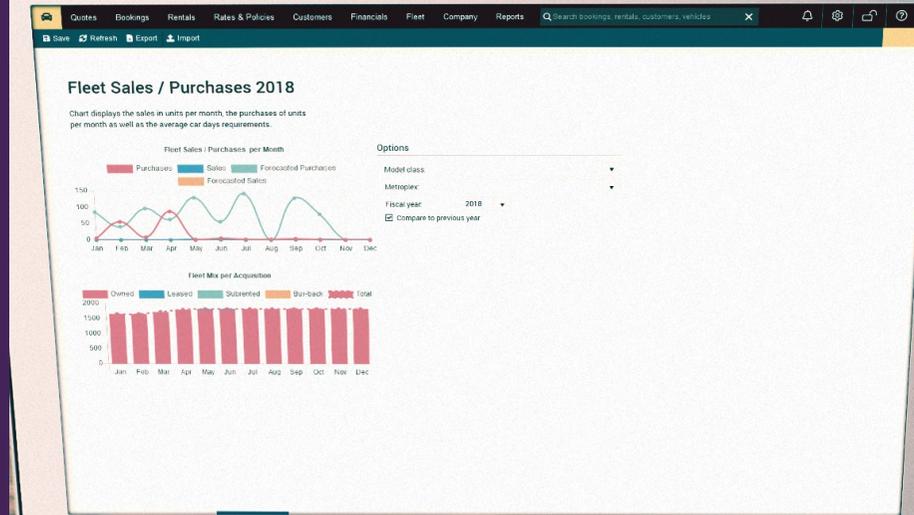

Richard Lowden, Green motion, United Kingdom

Security & Compliance

We put your information security and compliance on the top of our priorities list. Wheels was one of the first car rental systems to early adopt strong password requirements, best practices, detailed audit logs. Because you don't have to take our word for it, Wheels is certified against ISO-27001, PCI-DSS 3.2, and is OWASP compliant.

Powered by a cloud infrastructure located in Germany, Wheels uses various components such as Amazon Web Services, Auric Vault and others to ensure your eco-system is secure.

Our team of network engineers monitors 24/7/365 our infrastructure and your system.

"We have been working with Invensys for more than a decade and has been a constant partner to our company's success from its early stages to our present growth. In a business that there is a variety of systems available to choose from, Wheels Car Rental has major advantages that differentiate it from the rest"

Maria Tsakatoura, Avance, Greece

Customer Service

We are in the **service industry**, just like you; our **customer service** team is made of people that love their job and will go **the extra mile** for your satisfaction.

Whether by **Telephone**, **Chat**, or our **Customer Service Portal** our team is extremely responsive to provide answers and solutions or train you and your people in key areas of the system.

Our **business goes well** when your **business goes well**.

"[Their] software does more than they write on their brochure and you can read it there. My experience with them is very good and in my 29 years of experience I've worked a very rare with such people."

Vural Isel, Europcar, Turkey

Damage Management

Wheels includes a full blown damage management module which starts with the check-out inspection and includes an intuitive damage matrix which you can setup as you want.

Damages are documented with photos right on the rental agreement and are easily accessible by your customer service team.

Each vehicle has its full damage history and repairs which is accessible from the vehicle screen itself.

"I have been in this business for many years and working with different systems and this system is designed for all of our needs. We highly recommend this system to everyone"

Daney Hasso, Orange Car Rental, Iceland

Fleet Management

Been sales focused will eventually increase your revenue; but what if you could reduce on costs as well? Wheels monitors all **vehicle expenses** including acquisition, de-fleeting, sundry expenses, maintenance and purchase orders as well as **depreciation**.

Report on your expenses on a **vehicle, model, or make** basis to review your actual holding cost and compare this to your sales to project your revenue at the click of a button.

"Highlight of all is professionalism and supreme Customer service we are getting from the Wheels team. Not only we have that impression, but the results are saying that there is nothing that can't be done. We simply feel safe as Customers and that feeling is priceless."

Kosana Arsic, Europcar Serbia & Montenegro, Serbia

Paper-less Office

Eliminate paperwork by utilizing the paper-less office features of Wheels Car Rental. Using signature pads, identity readers, POS integration and more, you can significantly reduce the time at the desk while your staff focuses on upselling.

Use any of 3M, Gemalto, 365ID device readers to rapidly fill out customer screens, while the Topaz product line helps you make the rental agreement fully paperless while storing a signed copy for your archives.

"We are currently using Wheels to manage our rental business. They have always presented a very professional and friendly approach to a number of queries and ideas by giving us a personalized and speedy service with only the best solutions. Thanks to these experiences, we feel secure about our IT system, because we can always rely on them!"

Karolina Frankowska, Enterprise, Poland

A partnership that matters

We pride ourselves for our prompt and friendly customer service we offer to our customers. We are always open to attend to our customer needs, listen for suggestions and improvements and offer our services when you need them.

Our software assurance agreement is the FDW of car rental software. With no hidden fees or surprises, our goal is to engage in a long term business partnership with your company, not just product sales.
